Achivement

Flight Booking System

This system enables the advance booking in any class against journal and lady's quota on payment of fare in full for adults and half for children. It also provides details about time table, train fares, current status of reservation, position train available between a pair of Airport, accommodation available for a flight/date combination.

This Application using Spring boot and Angular used for user interface. It is a double-role application project i.e. Admin and User, where Admin will have the main control over the system. Admin will be responsible for maintaining the system and also, keeping a check on the availability of flight, and updating any details related to the Flight Booking. On the other hand, Users can register themselves and can do online Booking.
